

Homework

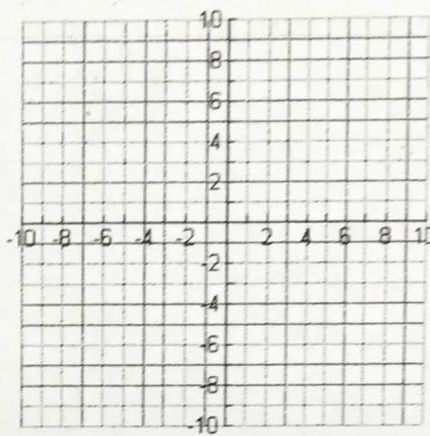

Name _____

Solve the systems by graphing.

1. $x + y = 4$
 $-5x + 2y = -6$

2. $2x = 8$
 $y - x = 1$

Solve the systems by linear combination (elimination)

3. $-10x + 3y = 24$
 $-2x - 3y = 12$

4. $y + 2x = -3$
 $y = 2x + 9$

Solve the system by substitution

5. $y = 4x - 7$
 $y = 2x - 3$

6. $4x - y = 1$
 $2x + y = -1$
